Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14, 15 and 17-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Ou (5,772,545). Regarding claim 14, Ou discloses a method for forming a sports ball comprising inflating a bladder (31), adhering a reinforcing thread (331) about the bladder to form a web layer and applying a resilient layer (34) to the web layer.

Regarding claim 15, note steps (8) and (11) in column 6 of Ou.

Regarding claim 17, note Figure 7 showing the deflated bladder (30) in step (H).

Regarding claims 18, 20 and 25, Ou teaches a rubber layer (34) that is adhered to the web layer.

Regarding claim 19, note step (4) in column 6 of Ou.

Regarding claim 21, Ou teaches adhering the bladder, web layer and resilient layer together.

Regarding claims 22 and 23, note steps (5) and (6) in column 6.

Regarding claim 24, note step (7) stating that the cover is to be turned right side out.

Regarding claim 26, Ou includes a lining layer 27' adhered to the ball cover panels.

Regarding claim 27, note step (2) teaching nylon thread.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ou (5,772,545).

Note steps (1) and (4) stating that the bladder is to be inflated. It would have been obvious to one of ordinary skill in the art to inflate the bladder to the recited circumference as the applicant has not shown the criticality for the recited dimensions and it appears that the teachings of Ou would provide similar results.
